

BURECO AG is a GMP and GLP certified bioanalytical service organization for the Life Science Industry worldwide. We offer biochemical, radiometric, immunological and cell based analytical technologies since 1992.

COMPANY PROFILE

BURECO AG was founded in 1988 by Dr. E. Bürgisser as a consulting organization and established laboratories in 1992 providing bioanalytical services for preclinical and clinical sample testing.

Since 1993 BURECO AG is GLP certified and obtained the GMP certificate in 2005. BURECO AG is a continuously expanding service provider, with highest flexibility. It is known as a reliable partner delivering data of outstanding quality and adherence to timelines. This is proven by long-term relationships with clients worldwide. BURECO AG permanently evaluates and implements new technologies in order to meet customers' expectations and requirements.

FACILITIES – INFRASTRUCTURE – PEOPLE

The facilities of BURECO AG are located close to Basel, one of the most interesting areas for the life science industry in Europe and a highly stimulating academic environment. For the performance of biochemical, radiometric, immunological and cell based assays a well equipped infrastructure of about 500 sqm is available and the high quality of services is assured by a motivated team and by our scientific expertise (about 50% of the employees with academic degree) and regulatory competence.

PRODUCT – SERVICES

BURECO AG offers bioanalytical services for the pharmaceutical and medical devices industry under GLP/GMP compliance for preclinical, clinical and post-marketing studies, as well as for release and stability testing of biopharmaceuticals. Beside the standard biochemical assays like ELISA, EIA, receptor binding and enzyme assays, assays with isotopic read-outs are performed, and functional cell based assays including cell binding assays have been successfully established several years ago.

The experience of BURECO AG focuses on assay development, assay implementation, assay validation and sample testing including sample storage and includes test systems for:

- Biomarker determination in animal and human samples
- Determination of concentration of biopharmaceuticals
- Immunogenicity/Neutralizing Antibodies/Anti-Drug Antibodies
- Release and Stability Testing (under GMP)
- Endotoxin (LAL) and In vitro Pyrogen (IPT) Testing

Our remote temperature controlled sample storage ensures constant conditions and capacity sufficient for several thousand samples in different formats.

Reporting and data transfer will be provided in the requested customized format.

CUSTOMER – BUSINESS MODELS

BURECO AG has established a worldwide customer base. We are collaborating with big and mid-sized pharmaceutical companies as well as with biotech companies. Reliability and integrity as well as quality is proven by long-term relationship with our customers.

BURECO AG offers a flexible and transparent business model and supports customers with its expertise from the beginning of the project planning and assists with expert advice throughout the course of a project.
